

FiberFirst Nokia App Guide

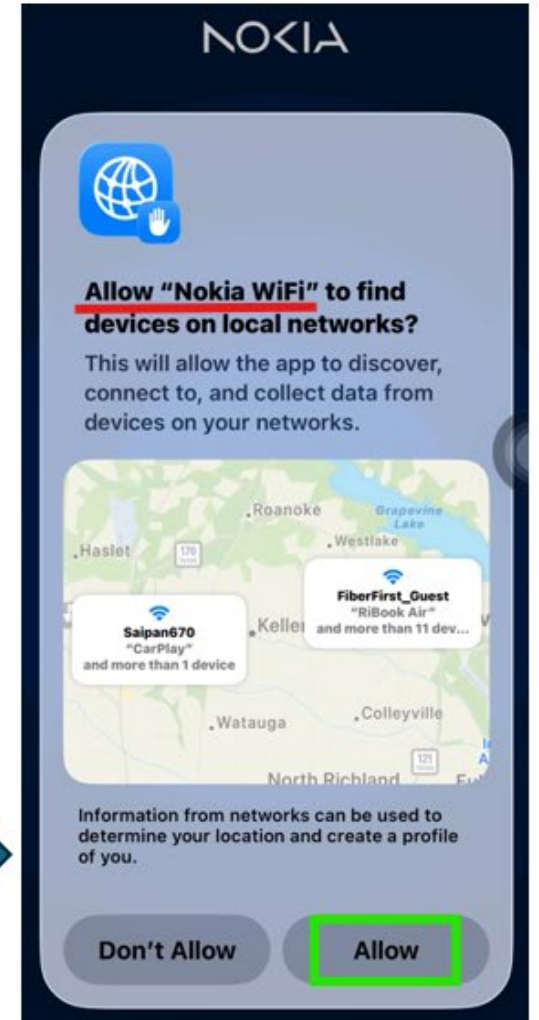

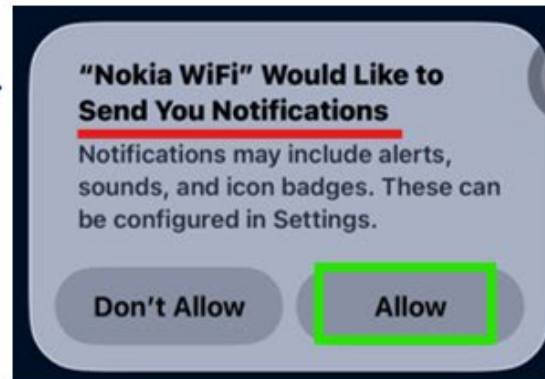

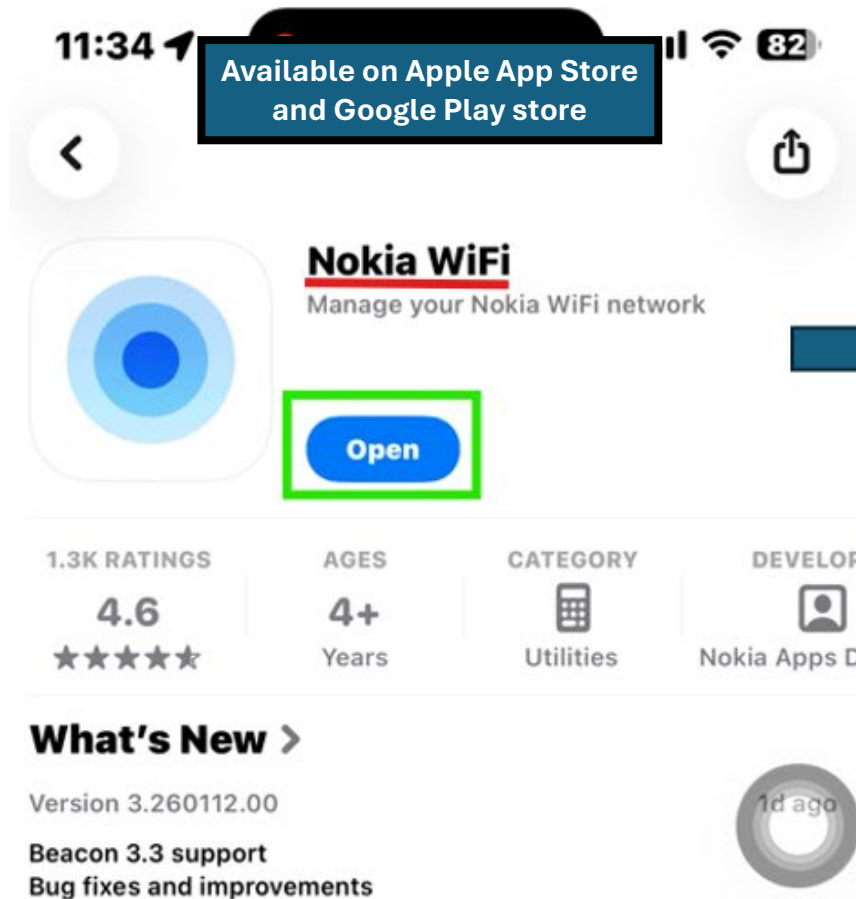

FiberFirst[®]

Connecting you with internet at the **speed-of-light.**

Nokia App Setup

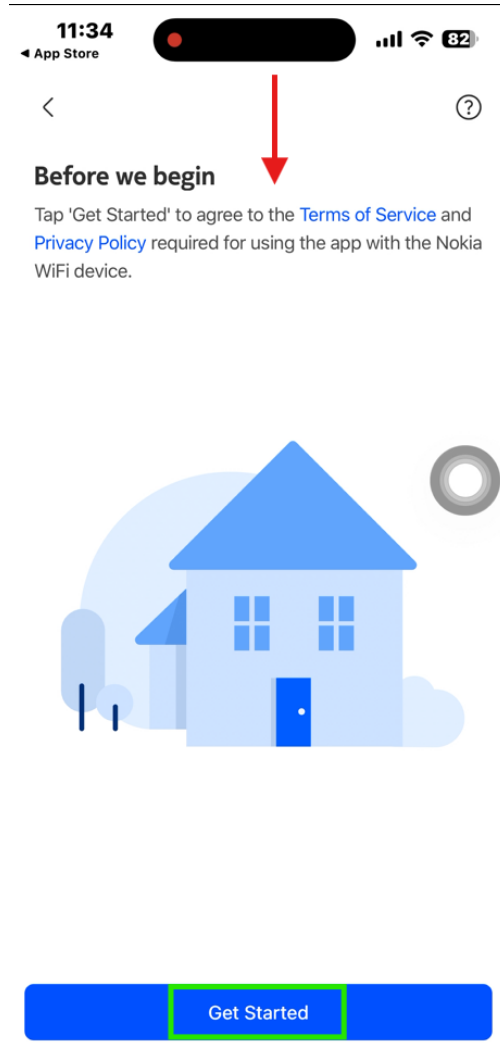

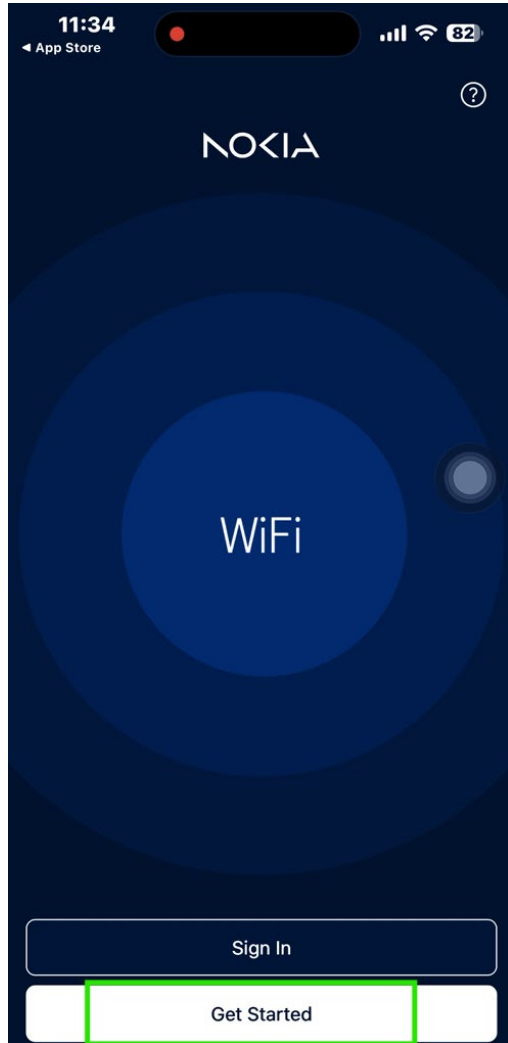

Step 1: Download and open the **Nokia WiFi App**. When prompted, choose your notification preferences and tap **Allow** so your device can find “Nokia Wi-Fi.”

Nokia App Setup

Step 2: Tap **Get Started**. The Terms and Conditions will appear, tap **Get Started** for the next prompt.

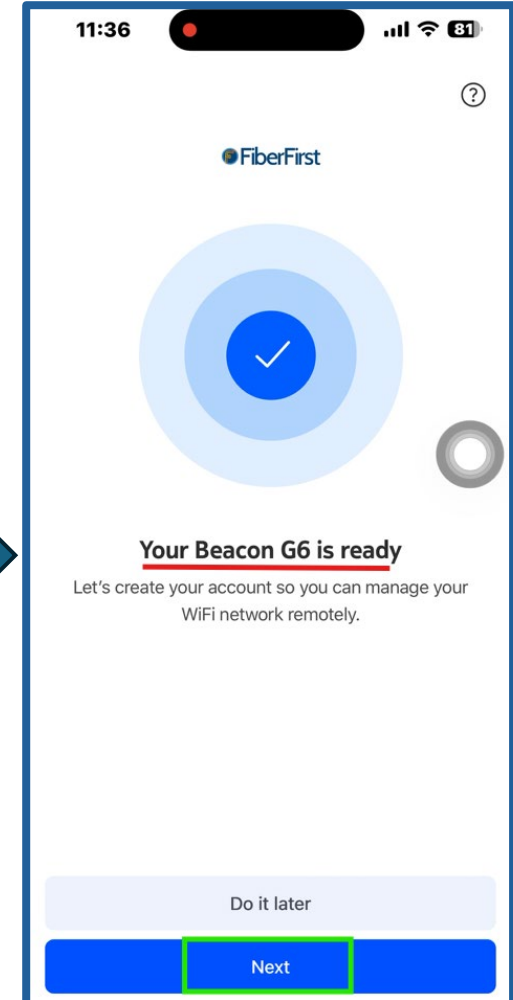

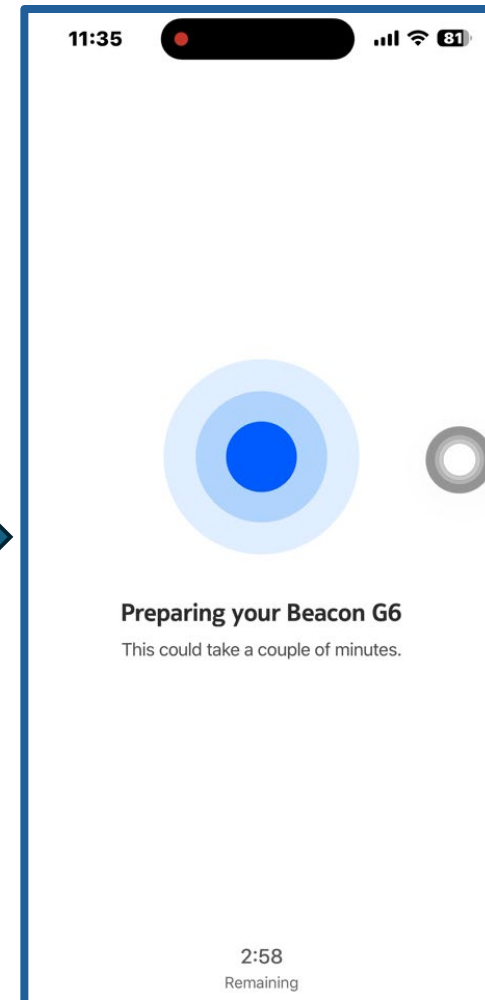

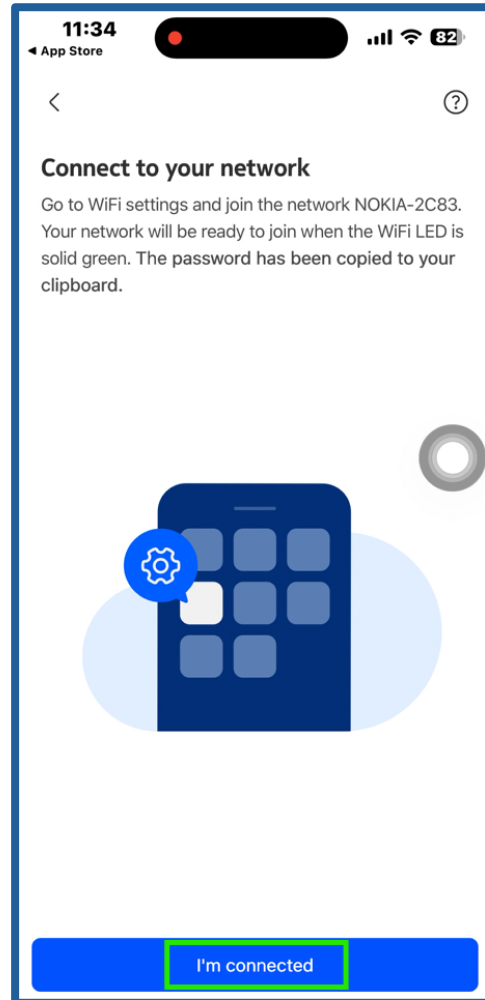

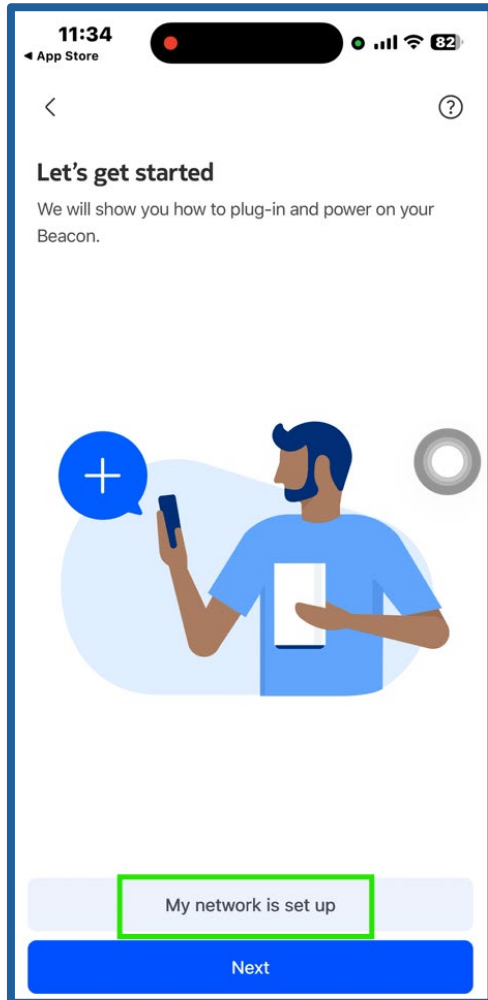

Step 3: Scan the QR code located on the bottom of your Nokia device. Make sure to allow camera access when prompted.

Nokia App Setup

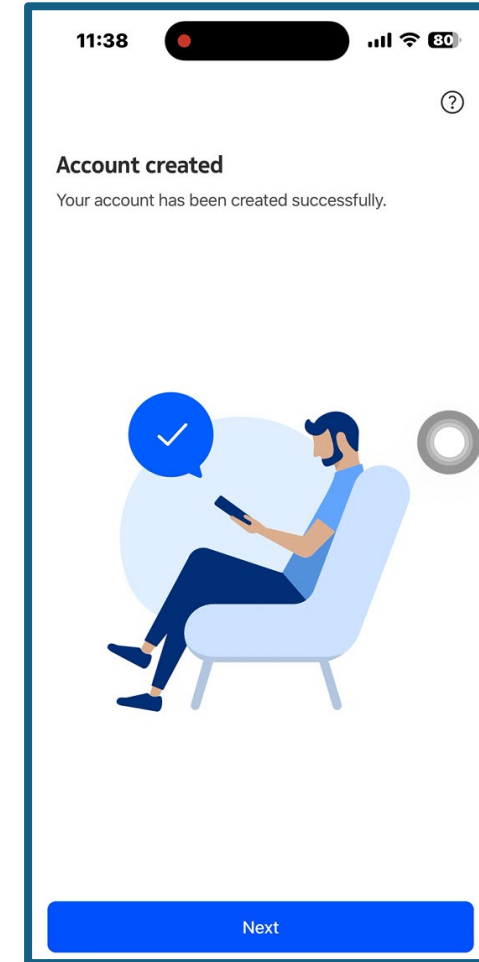

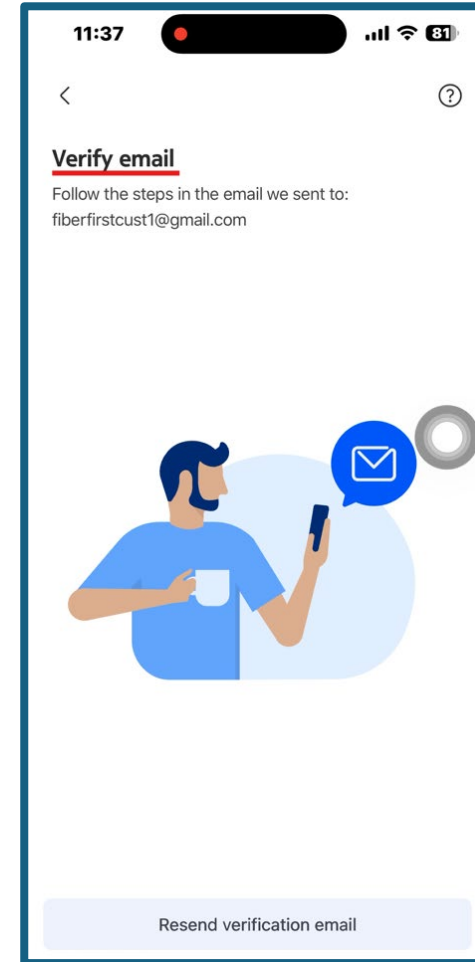

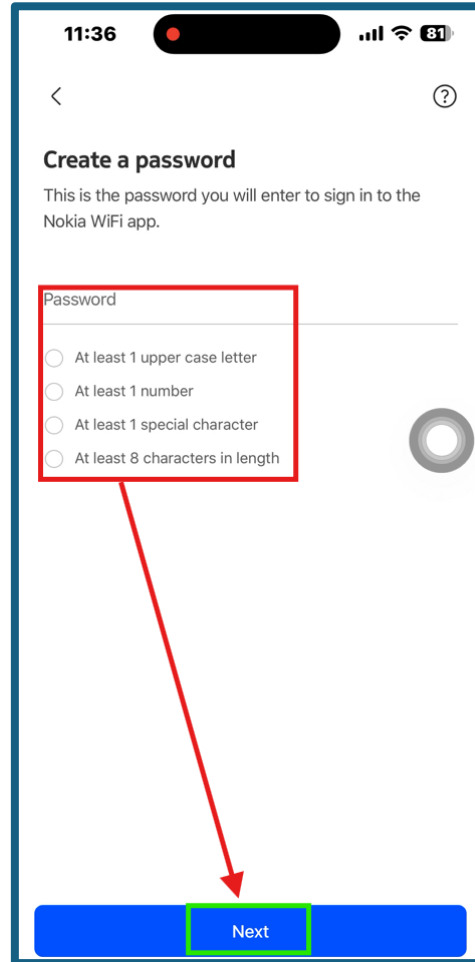

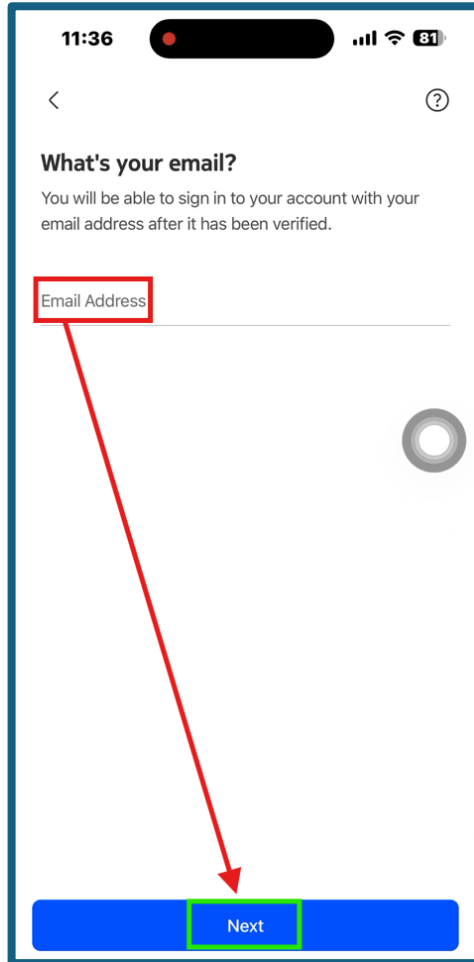

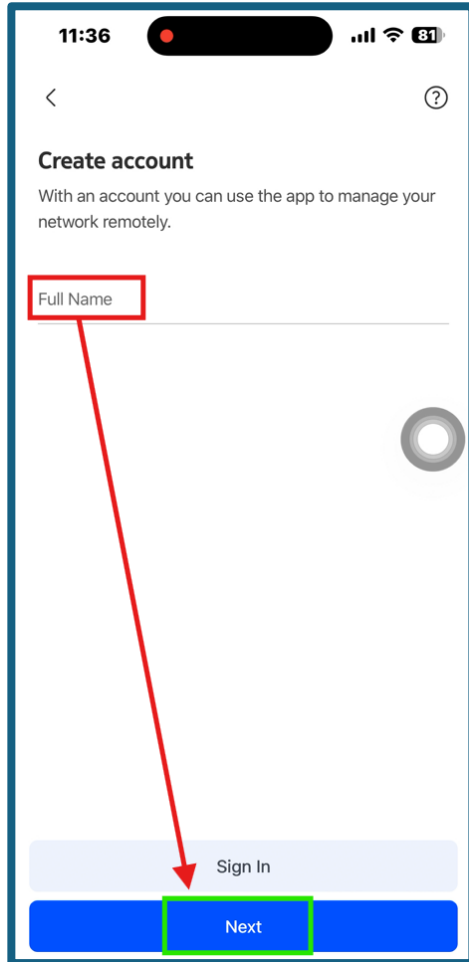

Step 4: Select “My network is set up.”

- If prompted to join your network (e.g., “NOKIA-XXXX”), follow the instructions.
- If you are already connected, select “I’m connected.”
- Once your Beacon is connected, you will be prompted to create your Nokia account. Tap **Next** to continue.

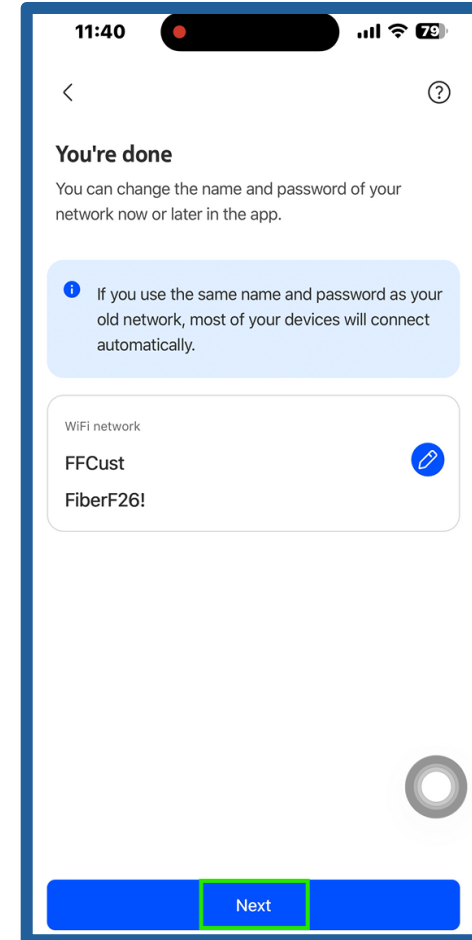

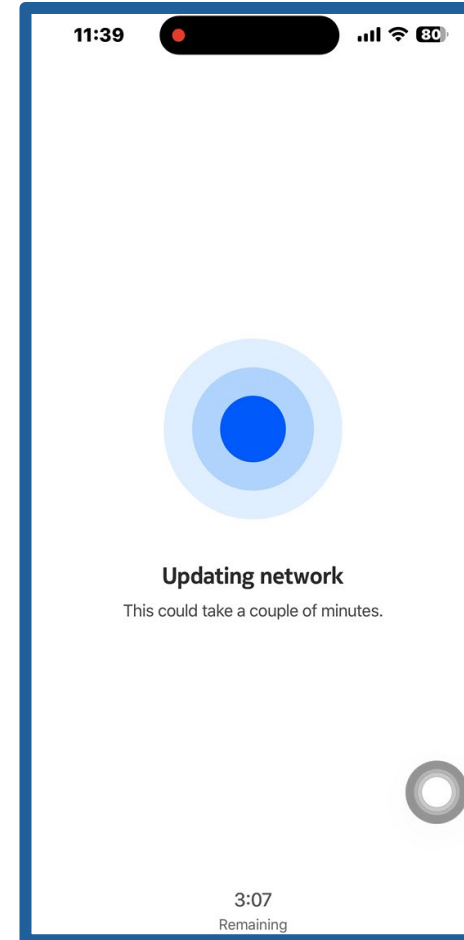

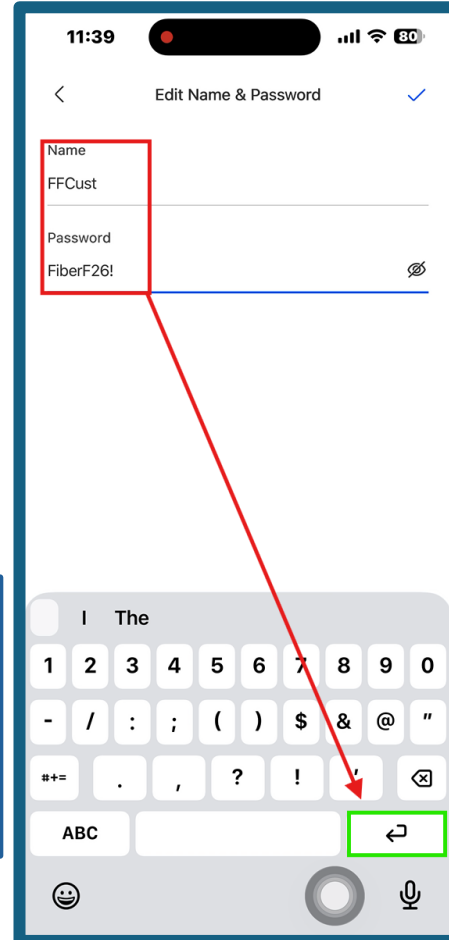

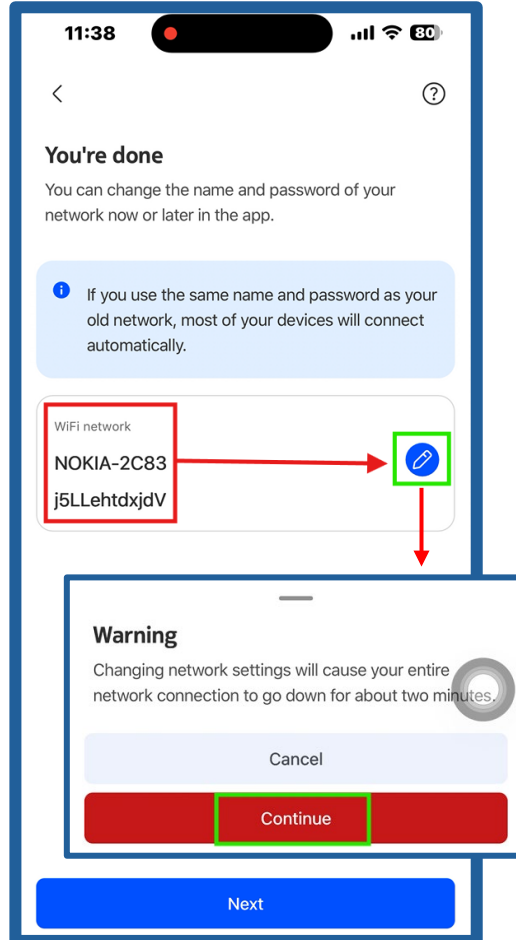

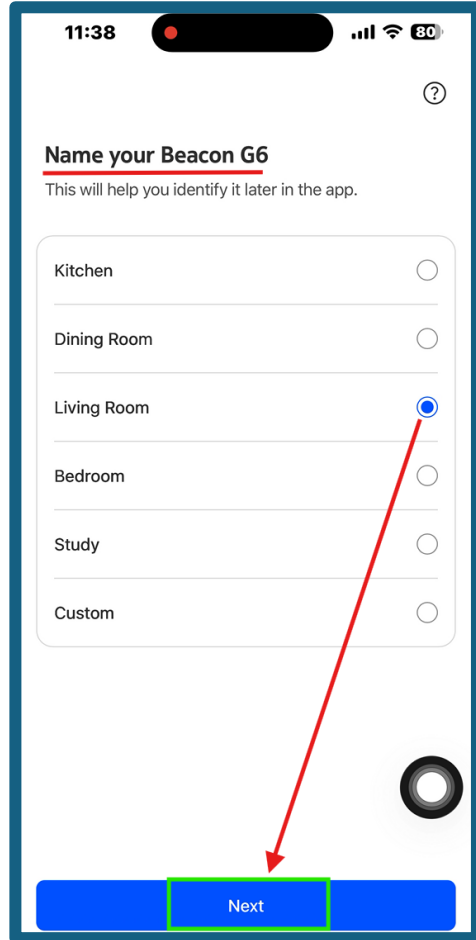

Nokia App Setup

Step 5: Enter your name, email address, then create a password. Tap **Next** and a verification link will be sent to your email. Once your email have been verified your account will be created, tap next.

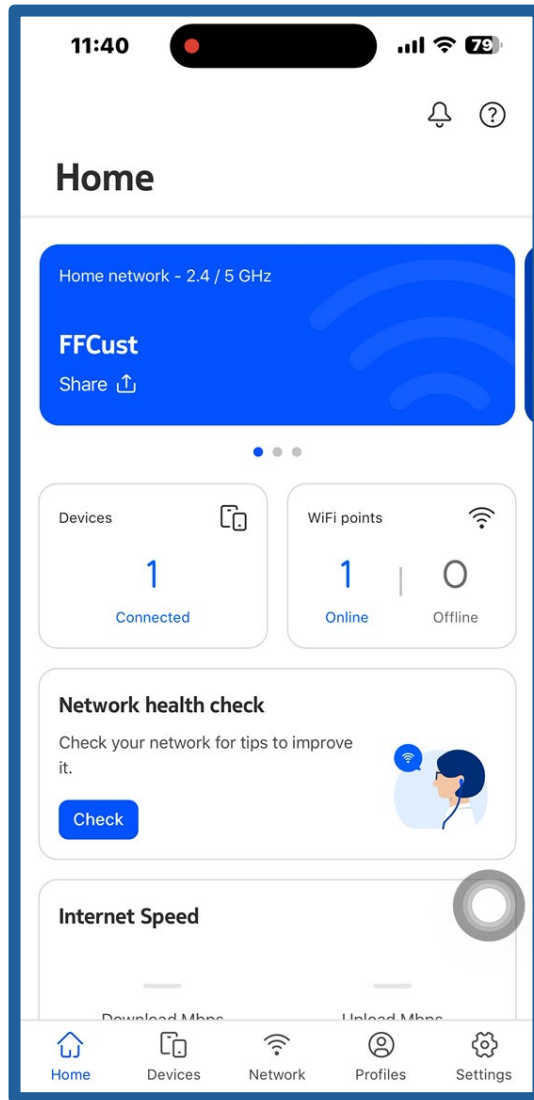

Nokia App Setup

Step 6: Name your Beacon (you can choose from the list or create a custom name), then tap **Next**. Change your WiFi network name and password, then allow time (2-3 minutes) for the network to apply the changes.

Nokia App Setup

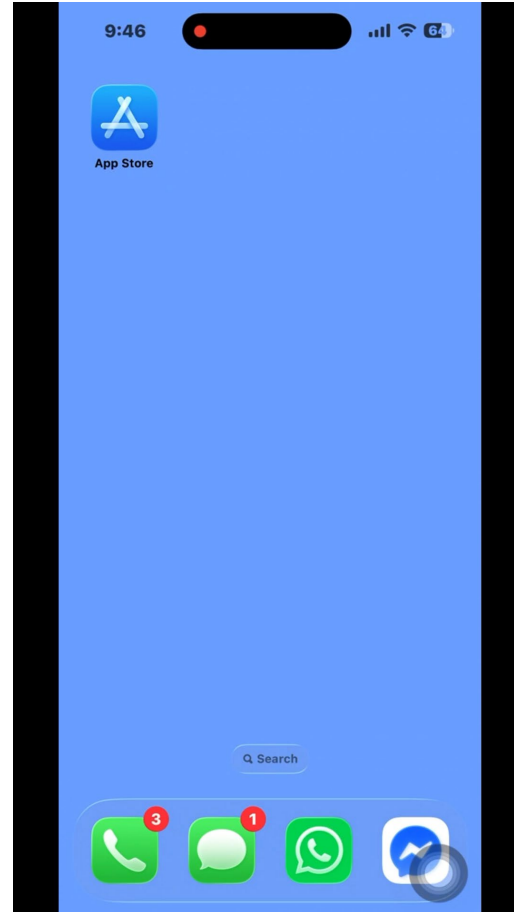

Step 7: Once the update is complete, you will have full access to the Nokia WiFi app features.

App “Home” Section:

- **Notification Bell:** Access all app notifications.
- **Help Icon:** Opens Nokia Help Center, allows sharing logs, and disconnecting the router.
- **Wi-Fi Details:** Shows network name (SSID), password, QR code, and active bands. Users can update Wi-Fi name and password.
- **Devices:** Lists all devices connected to the network.
- **Wi-Fi Points:** Displays router details and lets users connect extenders.
- **Network Tools:** Health Check: Evaluates network performance.
- **Speed Test:** Measures internet speed directly from the router.
- **Family Profiles:** Manage devices and parental controls.
- **Data Usage:** Track how much data each device uses.
